About BIO-UV

The sole and unique French ballast water treatment specialist **BIO-UV** designs and manufactures the complete ballast water treatment system **BIO-SEA**, which combines mechanical filtration and high UV dose disinfection, without any chemical treatment whatsoever, made with high marine quality components.

BIO-UV is an innovative industrial company created in May 2000 with a subsidiary in the USA (**Delta UV**, California). The **BIO-UV** Group designs, manufactures and markets systems and concepts of disinfection by ultraviolet light (UV-C) adapted to a large number of applications.

The **BIO-SEA** products are IMO type approved, USCG AMS accepted and USCG type approval currently in process.

BIO-SEA has equipped many vessels, with reliable, innovative, modular and cost efficient solutions.

About Choice Ballast Solutions, LLC

Founded in 2013, **Choice** is an engineering solutions and service provider for ballast water treatment systems (BWTS) in the Maritime market sector. **Choice** provides compliance planning, integration engineering, installation and aftermarket service and parts. **Choice** along with key partner Netsco, a naval architecture and marine engineering firm offers more than two centuries of combined in-house experience to the maritime industry.
