

HYDE MARINE SELECTS PARTNERS FOR ENGINEERING AND INSTALLATION OF HYDE GUARDIAN GOLD BALLAST WATER TREATMENT SYSTEM

PITTSBURGH, PA — May 6, 2014 — Hyde Marine, Inc., a wholly owned subsidiary of Calgon Carbon Corporation (NYSE: CCC), announced today that it has established two partnership agreements for engineering and installation of the chemical free Hyde GUARDIAN Gold™ Ballast Water Treatment (BWT) System -- both domestically and internationally.

Hyde Marine selected Cleveland, Ohio-based Choice Ballast Solutions, LLC (Choice) as an engineering partner – further enhancing Hyde Marine’s technical expertise for ship owners and operators, particularly in the U.S.

Separately, Hyde Marine selected UK-based SeaKing Electrical Group, which will serve as an installation partner for European markets.

“We recognize vessel owners are seeking ways to properly prepare for the ratification of the IMO Ballast Water Treatment Convention,” said John Platz, President, Hyde Marine. “Partnering with Choice helps Hyde Marine deploy a highly skilled engineering team dedicated to helping the maritime industry comply with ballast water treatment requirements, particularly for upcoming dry dockings and retrofit ballast water treatment systems.”

The Hyde GUARDIAN Gold BWT process uses efficient filtration and ultraviolet disinfection to treat ships’ ballast water to prevent the spread of invasive species from port to port.

“We are excited about the opportunity to work with Hyde Marine to continue the ongoing growth of the Hyde GUARDIAN Gold Ballast Water Treatment System across a variety of domestic and international markets,” said John P. Dooley, President of Choice Ballast Solutions, LLC. “Our goal is to ensure essential services are available for Hyde Marine as we work together to mitigate downtime for ship owners and operators as they seek to achieve ballast water treatment requirements.”

In addition to the engineering agreement with Choice, Hyde Marine’s alignment with the SeaKing Electrical Group will enhance installation services for the Hyde GUARDIAN Gold across European markets. “SeaKing’s reputation has been built on impeccable industrial relations, an exemplary safety record and first class standards of workmanship,” said Eric King, Operations Director of SeaKing. “Our vast marine customer base depends on our expert service to properly install and maintain all marine electrical activities.”

About Hyde Marine

With more than 100 years in the maritime industry and pioneering development of ballast water treatment technologies, Hyde Marine has become the leading U.S. manufacturer and educator regarding regulations, technologies, installation experiences, and challenges facing this sector. Since its initial launch in 1998, the Hyde GUARDIAN® BWTS has rapidly emerged as an industry leader featuring mechanical separation with stacked-disc filtration followed by UV disinfection – with more than 330 Hyde GUARDIAN units sold to date for installation in various ship types and sizes around the world.

About Choice Ballast Solutions, LLC

Founded in 2013, Choice serves to bridge the gap between survey and service in the ballast waste sector – providing engineering, drawings, project management, equipment commissioning and startup, and service. Choice is a sister company of Northeast Technical Services Co., Inc. (Netsco), a naval architecture and marine engineering firm based in Tampa, FL, which offers more than two centuries of combined in-house experience to the maritime industry.

About Seaking Electrical Group

SeaKing Electrical is a leading electrical engineering firm with offices in Merseyside and Aberdeen. It offers extensive experience and expertise in electrical engineering to the global marine, offshore and industrial markets.

This news release contains historical information and forward-looking statements. Forward-looking statements typically contain words such as "expect," "believe," "estimate," "anticipate," or similar words indicating that future outcomes are uncertain. Statements looking forward in time, including statements regarding future growth and profitability, price increases, cost savings, broader product lines, enhanced competitive posture and acquisitions, are included in the company's most recent Annual Report pursuant to the "safe harbor" provision of the Private Securities Litigation Reform Act of 1995. They involve known and unknown risks and uncertainties that may cause the company's actual results in future periods to be materially different from any future performance suggested herein. Further, the company operates in an industry sector where securities values may be volatile and may be influenced by economic and other factors beyond the company's control. Some of the factors that could affect future performance of the company are higher energy and raw material costs, costs of imports and related tariffs, labor relations, capital and environmental requirements,

changes in foreign currency exchange rates, borrowing restrictions, validity of patents and other intellectual property, and pension costs. In the context of the forward-looking information provided in this news release, please refer to the discussions of risk factors and other information detailed in, as well as the other information contained in, the company's most recent Annual Report.
